

## SCT Hardline Cable Stripping and Coring Tools

SCT-500ALU

SCT-750

- **High-alloy steel** ensures long blade life and optimum performance.
- **Dual-edged one-piece blade** guarantees correct blade alignment.
- **Stripping, coring, and beveling in one step** speeds connectorization.
- **Beveled outer conductor** prevents O-ring damage and minimizes water migration.

### DESCRIPTION

SCT stripping/coring tools are two tools in one. SCT cable strippers remove the aluminum sheath without scoring, while the cable coring function cores the dielectric and bevels the outer conductor on hardline cables.

### APPLICATIONS

SCT stripping/coring tools work on 0.412" through 1.000" hard-line cables, including PIII, T10, TX10, CommScope® Power Feeder, Times Fiber 50-ohm, PB10, MC2, and comparable HFC cables.

### SPECIAL FEATURES

#### Three Functions in One Operation:

SCT tools speed connectorization because they strip back and bevel the outer conductor and core the dielectric in one smooth operation.

## SCT Hardline Cable Stripping and Coring Tools

### SPECIAL FEATURES *(continued)*

#### Perfectly Aligned Cutting Edges:

The patented one-piece blade guarantees proper alignment of the two cutting edges. Manufactured from high-alloy tool steel that is heat treated to full hardness, the beveled edges remain sharp over a long life.

#### Precision Performance:

SCT tools core the dielectric and strip the aluminum sheath without scoring. The blade leaves a beveled outer conductor edge that eliminates O-ring damage, thereby minimizing water migration.

#### Manual or Drill Operation:

SCT tools can be ordered with a standard ergonomic handle or a Cable Prep brand RTH ratchet T-handle. Either handle can be removed for operation with a 3/8-inch variable speed drill.

#### Plastic or Aluminum Housing:

SCT tools come with either a rugged, lightweight plastic or aluminum body. Their color-coded guide sleeves match them to their companion Cable Prep brand JCS jacket-stripping tools.

# SCT Hardline Cable Stripping and Coring Tools

## ORDERING INFORMATION

SCT tools can be ordered with either a standard handle or a ratchet T-handle. The ratchet T-handle can be removed for use on any Cable Prep brand SCT- and AIO-series tool.

Replacement blade kits include a blade, screw, and hex key.

## SPECIFICATIONS

SCT aluminum tools for PIII, T10, TX10, and Trilogy MC2 cables are blue anodized aluminum.

SCT aluminum tools for PB10 cables are gold anodized aluminum.

The guide sleeve or sleeve band on each tool is color-coded to facilitate picking the right tool for a specific cable.
