"F" Series Terminators and Accessories
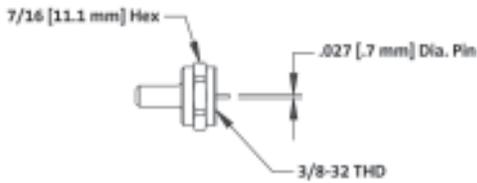

Our "F" series terminators are passive electronic circuitry designed to block 60 cycle and terminate RF signals on unused equipment ports. They are necessary to prevent impedance mismatches and minimize RF reflections and echoes. Unused active ports on trunk or feeder equipment should have a terminator installed. We offer a wide variety of terminators and drop accessories for a range of applications.
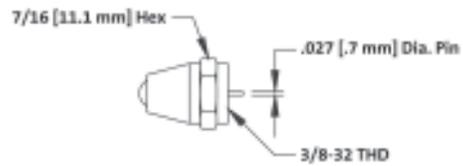

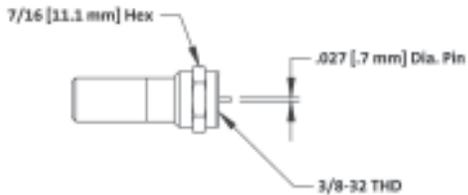

75 Ω Terminator
- GTR-59-A

### 75 Ω Precision Terminator
- NS-3082-1

75 Ω Power Blocking Terminator
- GTR-59-DCB

    Incorporates a capacitor to block 60 Hz AC Power
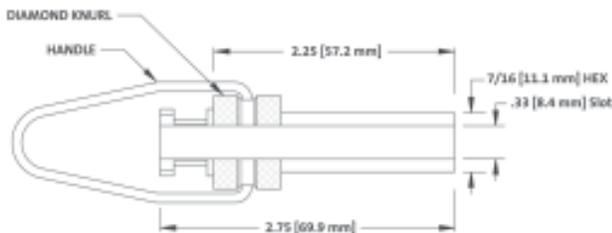

75 Ω Power Blocking Terminator
- GTR-59-S

   Designed for use with Security Shields and Security Shield Tool
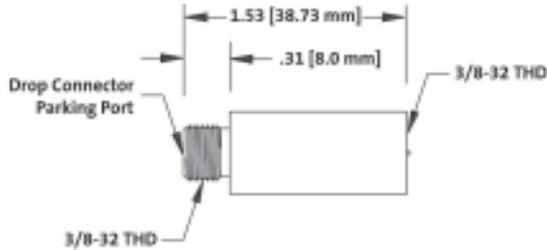

Security Shield Tool
- G-S-200

Security Shield
- NS-2412-13 Steel *(A)1.030 (B).585 (C).660*

    For use with Terminator and Security Shield Tool

Corning
Gilbert

Theft Proof Terminator

- GTP-59   Resistor, Gasket
- GTP-59-LR   No Resistor, Gasket
- NS-5762-5   Resistor, Gasket, Silicone Grease
- NS-5762-7   Resistor, Gasket, Ident. Groove
- NS-3268-5   No Resistor, Gasket, Silicone Grease
   Requires G-GTT-4 or G-GTT-7 tools for installation and removal

Theft Proof

- GTR-59-TP   Resistor, Gasket
- GTP-59-TP-SP   No Resistor, Gasket
    Requires IT-59-TP-S or IT-59-TP-L tools for installation and removal

Theft Proof Terminator

- NS-5762-3   Resistor, No Gasket
- NS-5762-9   No Resistor, No Gasket
- NS-5762-11   Resistor, Gasket
- NS-5762-13   No Resistor, Gasket
    Requires NS-6270-1 or NS-6270-3 tools for installation and removal

Theft Proof

- NS-7291-5   No Resistor, No Gasket
- NS-7291-9   Resistor, No Gasket
    Requires NS-7341-1 tool for installation and removal
